Sixteen Years' Experience in handling spectacles, and a study of the business in a general way has enabled me to fit those whose sight was falling because of advancing age (Presbyopia) and those who were near-sighted (Myopic), but where astigmatism or any negative of the sight against all LOWeSt. any peculiarity of the sight existed I was obliged to refer the customer to a city oculist. Not satisfied to do a business that I could not do properly. I determined to study Refraction. I secured the best works on that subsecured the best works on that subject, "Fartridge on Refraction." by Ginstevas Hartridge, F. R. C. S., a well recognized authority on Optics and Refraction, and these I studied well. I also attended lectures at the New York Optical School last fall, and bought the best quality testing case and outfit at \$100, and feel justified in making the announcement that I am now ready to prescribe for that, I am now ready to prescribe for and correct the vision of almost any and all conditions of the eye where glasses are needed. The liberal patronage extended to me during the sixteen years I have been in business here encourages me to enter this new field in connection with my regular business, and believe my customers will be glad to know that they can get

Any sarsaparilla is sarsaparilla. True. So any tea is tea. So any flour is flour. But grades differ. You want the best. It's so with sarsaparilla. There are grades. You want the best. If you understood sarsaparilla as well as you do tea and flour it would be easy to determine. But you don't. How should you? When you are going to buy a commodity whose value you don't know, you pick out an old established house to trade with, and trust their experience and reputation. Do so when buying sarsaparilla.

busy, and we are all at work under the one engineer who came down from his throne in heaven to oversee and help the removal of that mountain, and who has contracted to have it done. I have Latin, attempt no drafts upon Latinity. You who want to help in the removal of the mountain hold on to your shovel. Much time has been lost by the fact that many of the sharpest shovels, instead of being used for the removal of Old and New School Shovels.

The great Presbyterian church was mightily hindered by the fight that for years went on between old school shovnow rightly engaged that no statistics can count them. I tell you the mountain is coming down. It is coming down rapidly. It will all come down. There are those who hear or read these words who will gaze upon its complete prosing back any longer the full statement of the fact, which I have somewhat delayed through lawful sermonic strategy, the fact that the Lord God Almighty, in the full play of his omnipotence, will accomplish this supernal work. If God can build a mountain, I guess he can remove a mountain. After God has given full opportunity for the shovels he will come in with his thunderbolts. We have amplified the idea of the Lamb of God. I tell you now of the lion. Here is a thought that I have never seen projected, and yet it is the most cheering of all considerations and plainly Scriptural, the thought that as at the opening of the gospel dispensation in the Christly and Johanian and Pauliue days the machinery of the natural world was brought into service, the shadow of eclipses and the agitation of earthquakes, tempests put to sleep under the voice of divine lullaby, iron could regulate it accordingly. The inbolts of prisons shoved back by invisible muscle, kindling of flame on heads of worshipers, by instantaneous pharmacy great practical boon on both the deaf blasted vision given full eyesight, and the dead returned from the eternal world, mingling amid earthly scenes, so it will be again. Return of the Supernatural. As I read my Bible, these supernat-

urals are to return. Again the eclipses, as at the destruction of Jerusalem, will put red wing under the moon and black | nates. wing under the sun, and the mountain will shake with ague of excitement and hospital cots be emptied as their patients bound into sudden health and the gospel of mercy emphasized by most tremendous spectacles. "And I beheld when he had opened the sixth seal, fractions of a penny in its periodical and, lo, there was a great earthquake, and the sun became black as sackcloth the national debt. From this source the of hair, and the moon became as blood state has accumulaated in the last 100 * * * and every mountain and isly d years the sum of \$750,000. were moved out of their places!" There you have it. The shovels now digging away at the mountains to be re-enforced by thunderbolts. The gospel is only partially successful because we preach it amid all placidities, the hearers having heard the invitation a thousand times before and expect to hear it a thousand stellar panics and shattered masonry dead will spring into roseate life. I say, then the gospel will be universally ac-

something of trepidation, now we utter O great mountain? Before Zerubbabel

"The enemy are pushing us, and so I open battle. We are not sufficient to cope with them, but I hope the reserve would come up." After awhile the Tent. The Mountain of Sin.

My experiences with the shovel are seen tossing on the ridge of the hill, that you cannot do much by one push of that implement, and that after you that implement, and that after you the long lines of mounted troops, their hold its district meeting with Accothat you cannot do much by one push and then the flash of swords, and then

All Heaven to the Rescue.

That is just the way now. In this great battle against sin and crime and moral death the enemy seem too much for us. More grogshops than churches, for us. More grogshops than churches, more bad men than good men, and they thy possession." The reason so many of us are idle is that we want a bigger there! Hold on! Re-enforcements are shovel or we would like to manage some great hydraulic engine. No, brother. Stick to your shovel. Dig away in your Sabbath classes. Dig away in your missing the first should be shown to manage some coming. Through the glass of inspiration in the first should be should be shown to manage some coming. It has been proposed to utilize this system of "seeing the voice" in vocal schools by a regular method of comparison of the rec ords of pupils with those of eminent art-

The question of the practical applica tion of such visual reproductions in the oral education of the deaf has also been frequently mooted, but in neither case has any useful result so far accrued. As is well known, the speech of orally educated deaf mutes is not usually so natural, and hence not so easily under-stood, as that of those who hear. This is chiefly due to the absence of the controlling action of the hearing. If this could be supplied by visual means, much might be accomplished. Mr. Farrar suggests that physicists should take up and all cemetery work in genthis question with a view to devising a simple and efficient apparatus by which an orally taught deaf mute could test his speech to ascertain how far it corre sponded in inflection, etc., with that of could regulate it accordingly. vention of such a device would confer a
